## Data from St. Joseph's Healthcare Hamilton Now being sent to HRM

On May 31, 2017, radiology and transcription reports from St. Joseph's Healthcare Hamilton (SJHH) are being sent to Health Report Manager (HRM) subscribers. This data is being sent via existing data integrations from the hospital to HRM, via ClinicalConnect. Physicians who subscribe to HRM can now receive their patient's SJHH reports electronically in their EMRs, in addition to reports from all those existing sending facilities from across Ontario - [click here](#) to see the names of organizations that send data to EMRs via HRM.

Thank you to the teams at SJHH and OntarioMD for completing this project to continuously advance digital health in Ontario.

## Welcome to a New ClinicalConnect Participant Organization!

Congratulations to the following healthcare organization that was

## ClinicalConnect Participation Agreement Framework Update

On Wednesday, July 5, the ClinicalConnect Participation Agreement will go into effect, replacing the current Data Sharing Agreement. Starting July 5, upon next login, all users will be prompted to accept the new ClinicalConnect User Agreement to continue their access to the portal.

The deployment of the ClinicalConnect Participation Agreement and associated framework has been a significant undertaking, with hundreds of existing Participant organizations and thousands of physicians who use ClinicalConnect contacted to complete their Participation Agreement based on their clinical practice and needs.

Almost all Participant organizations have submitted the Participation Agreement, and more than 800 physicians have submitted a Participation Agreement to access ClinicalConnect as a Sole Practitioner Health Information Custodian, instead of, or in addition to, accessing ClinicalConnect under the authority of another Participant organization.

Together with the cSWO Delivery Partner teams, we will continue to work past the July 5 Agreement Effective Date to onboard additional Sole Practitioners, and other new healthcare organizations as part of our regular engagement and adoption activities.

Thank you to everyone, particularly our cSWO Delivery Partner teams, for their assistance in helping to successfully complete this important milestone.

## New ClinicalConnect Logout/Quick Links Page

In an effort to support eHealth Ontario's Single Sign On Standard, after clicking 'Log Out' of ClinicalConnect, all users will now be directed to a new landing page that in effect, completes the logout process.

However, if the user had been accessing ClinicalConnect using ONE® ID credentials, from here they can end their ONE ID session and also log out of all ONE ID federated

approved to become a ClinicalConnect Participant Organization in June 2017:

- Good Shepherd Non-Profit Homes [HNHB LHIN]

## Canada 150

The ClinicalConnect team and the HITS eHealth Office would like to wish you a Happy Canada Day as we celebrate 150 years of confederation on July 1.

services.

This new logout landing page provides quick links to log back into the portal, and also to access other ClinicalConnect ancillary services, such as the Access Governance System (AGS), Self-Service Password Manager (SSPM), as well as ClinicalConnect-related SharePoint sites for LRAs, Privacy Contacts and Sole Practitioners, who may participate as Health Information Custodians unto themselves.

## New User Functionality in ClinicalConnect: UAO Selector

On July 5, Local Registration Authorities will be able to provision a user who is a regulated health service provider to access ClinicalConnect as Agents of more than one Participant organization, using one set of login credentials. These users will be prompted with an "Under Authority Of" (UAO) Selector upon logging into the portal, and can then select which organization they are currently accessing patients' PHI on behalf of and will have the ability to easily toggle between organizations they are authorized to view PHI as appropriate.

Please [click here](#) to learn more about the new UAO Selector.

## Expanded Access to Medication Data from DHDR using ClinicalConnect continues

ClinicalConnect users at four Participant organizations were recently granted access to data from the provincial Digital Health Drug Repository (DHDR).

Users at the following organizations now have access to the DHDR from within ClinicalConnect.

- Brant Community Healthcare System
- Homewood Health Centre
- Joseph Brant Hospital
- St. Joseph's Healthcare Hamilton

To view the list of 48 Participant Organization sites who currently have access to DHDR data from within ClinicalConnect, in addition to other provincial repository data, please [click here](#).
