

**February 27, 2019**

### **Implementation of ClinicalConnect's New Cardiology Module**

We are pleased to announce that a new Cardiology module was implemented in ClinicalConnect on February 27, 2019, and is available to all authorized users of the portal.

The new module was implemented to help streamline the user experience by locating cardiology-related data in one module as opposed to it being spread between either or both ClinicalConnect's Radiology and Transcription Modules.

*Currently, cardiology reports and images (where available) from Hamilton Health Sciences and London & Area Hospitals now display in the Cardiology Module; this type of data from all other data contributing organizations remains in either/both Radiology and Transcriptions Module.*

All cardiology-type data from SW Ontario hospitals is expected to display in the new Cardiology Module by Spring 2019.

For complete information about the new module, please visit the [ClinicalConnect Resource Centre](#).

Thank you to our hospital partners who helped support the successful implementation of this new module.

---

ClinicalConnect is the Regional Clinical Viewer for the cSWO Program, funded by eHealth Ontario. Hamilton Health Sciences is the Solution Provider deploying ClinicalConnect across the four south west Ontario Local Health Integration Networks. The cSWO Program is part of eHealth Ontario's ConnectingOntario initiative which is enabling the Province to achieve an electronic health record solution for all Ontarians.
