Additional Home & Community Care Data Now Available in ClinicalConnect

The HITS eHealth Office is pleased to announce that Home & Community Care (HCC) data from Local Health Integration Networks (LHINs) located outside south west Ontario is now available in ClinicalConnect. The additional data, available in the ClinicalConnect's Home & Community Care Module, includes:

- Coordinated Care Plans
- Equipment & Supplies
- Notes
- Referrals
- Risks
- Safety Issues
- Services

This additional data has been made accessible via ClinicalConnect's existing integration with eHealth Ontario's Acute & Community Clinical Data Repository (acCCR), which also provides reports from hospitals outside of south west Ontario that display in the Transcriptions Module.

Currently, ClinicalConnect users at Hamilton Health Sciences have access to data from the acCCR. eHealth Ontario continues to develop their plans for other Participant Organizations to gain access to data from this and other provincial repositories.

For more information about the Home & Community Care Module of ClinicalConnect, please visit <https://info.clinicalconnect.ca/CC/healthcare/resource-centre-ccac-overview>.

For more information on eHealth Ontario's acCCR, please visit <https://www.ehealthontario.on.ca/en/for-healthcare-professionals/acute-and-community-care-clinical-data-repository>.

ClinicalConnect is the Regional Clinical Viewer for the cSWO Program, funded by eHealth Ontario. Hamilton Health Sciences is the Solution Provider deploying ClinicalConnect across the four south west Ontario Local Health Integration Networks. The cSWO Program is part of eHealth Ontario's ConnectingOntario initiative which is enabling the Province to achieve an electronic health record solution for all Ontarians.
