## **ClinicalConnect's Next Release (Version 5.2) Now Live**

We are pleased to announce that the next release of ClinicalConnect, known as version 5.2, was successfully implemented on May 26, 2021.

Highlights of the new version include:

- ClinicalConnect users can now access preference settings associated with how they prefer to view data in the Patient Header and Timeline by clicking the new 'gear icon' located in the Patient Header.
- Building on the existing New Results email notifications, which to date has not been widely available to ClinicalConnect users but will be shortly, users are now required to verify the email address they input when subscribing, in ClinicalConnect, to receive these notifications. As this New Results notification functionality is deployed more broadly, ClinicalConnect users will be notified accordingly, including instructions of how to subscribe to these kinds of emails.
- Other back-end portal enhancements to improve system operations.

ClinicalConnect users may visit the [ClinicalConnect Resource Centre](#) to view PDF and video-based training materials related to this latest release.

For more information on ClinicalConnect, visit <https://info.clinicalconnect.ca>, or contact:  
Kate Black, Service Delivery & Communications Manager, 905-577-8270 ext 5, [blackka@hhsc.ca](mailto:blackka@hhsc.ca)
