

# Launching ClinicalConnect™ from PointClickCare

## Launching ClinicalConnect from PointClickCare

At select Participant Organizations, ClinicalConnect can be launched directly from the clinical information system, if enabled by the organizations. This user guide describes how to access ClinicalConnect from within PointClickCare (PCC).

## About ClinicalConnect

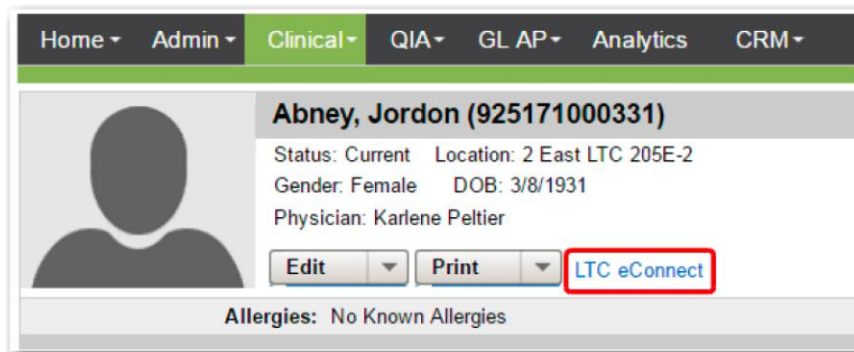

ClinicalConnect is a secure, web-based portal that provides physicians and clinicians with real-time access to their patients' electronic medical information from hospitals, Local Health Integration Networks' Home & Community Care Services (formerly Community Care Access Centres) and Oncology Centres in South West Ontario, including provincial data repositories. ClinicalConnect is a fundamental tool in bridging the gap between disparate information systems spanning a wide geographical area and multiple regional health care facilities. Visit the [ClinicalConnect website](#) for more information.

## Accessing ClinicalConnect from PointClickCare

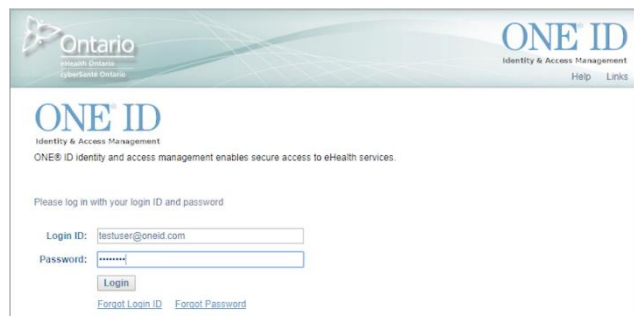

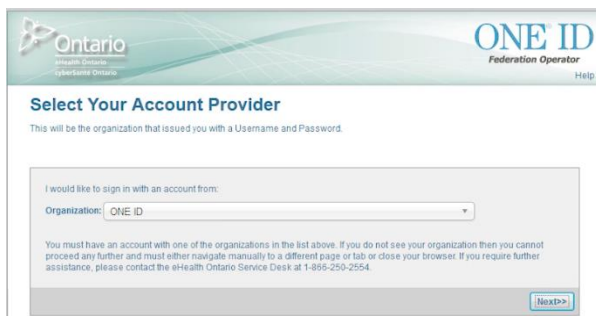

Physicians and clinical staff who have access to PointClickCare will see a link in the patient's record called **LTC eConnect** that can be used to launch into the patient's ClinicalConnect record where additional electronic medical information about the patient is aggregated. In PointClickCare, the **LTC eConnect** link is available from the **Clinical tab (Resident chart)** and the **Wait List** in the Census.

## How to launch ClinicalConnect from within PointClickCare via the LTC eConnect Link

Once in the Resident's PointClickCare chart, click the LTC eConnect button in the header.

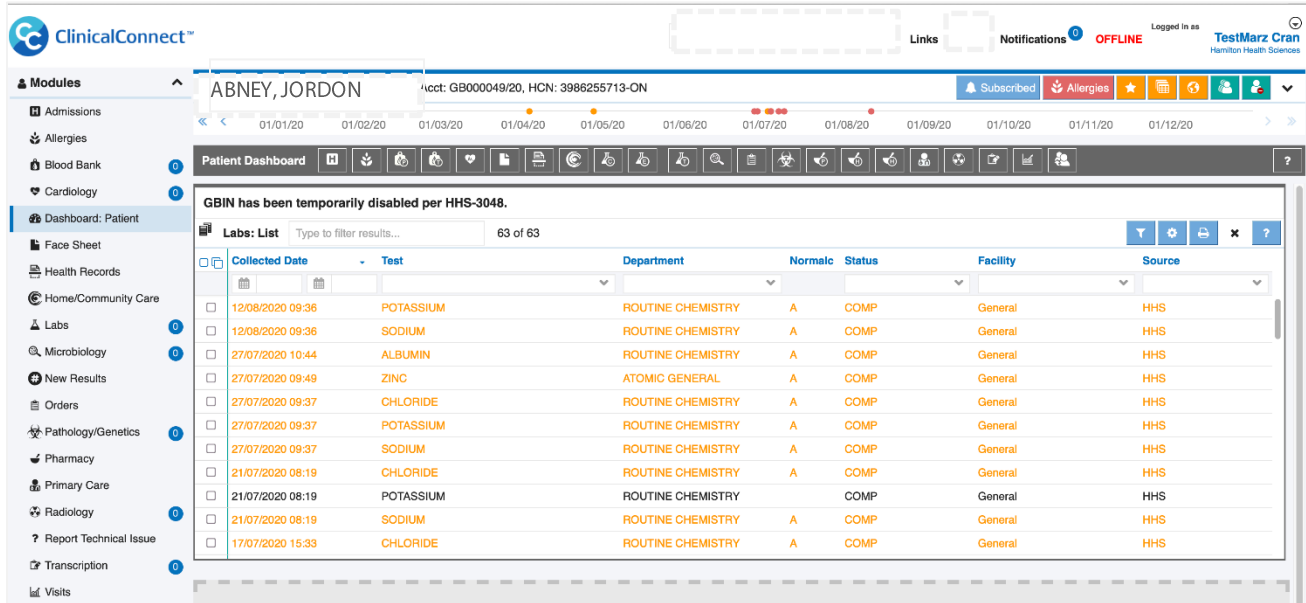

The Ontario Health's (Digital Services) ONEID login page will open, requiring users to log in with their ONE ID credentials.

## Launching ClinicalConnect™ from PointClickCare

Once logged in, the patient’s ClinicalConnect record will open.

To view health information for another resident, navigate to the resident chart in PointClickCare and click the LTC eConnect button in the header.

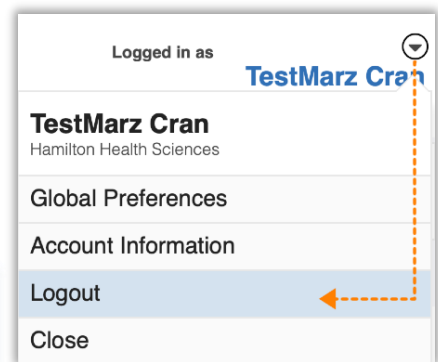

[Click here](#) to watch a video that demonstrates how to launch ClinicalConnect using the LTC eConnect link within PointClickCare.

### Logging Out of ClinicalConnect

You need to log out of ClinicalConnect after each session.

The log out option is located in top right corner of the screen where your log in name displays.

To log out, click your name then click **Logout**.

## Launching ClinicalConnect™ from PointClickCare

### Logging Out of Ontario Health's (Digital Services) ONE ID Service

After log out of ClinicalConnect, the ClinicalConnect Log out page will display. If you no longer require ONE ID access for any other services you are using, you must also log out of ONE ID after logging out of ClinicalConnect by clicking on the link shown below.

### Logging Out of ClinicalConnect

The following second logout is **only** required by individuals who use ONE® ID credentials to access ClinicalConnect; these users will **not** be fully logged out of their ONE ID session, including ClinicalConnect, until this logout link provided below is clicked.
