## What's Coming Next from ClinicalConnect?

Please stay tuned for more information about the continued expansion of ClinicalConnect's contextual launch capabilities for physicians and clinicians at London and Region hospitals. Contextual launch provides the ability for a user to access regional investigations about their patient by launching ClinicalConnect directly from their hospital information system - no need to log in separately to the portal.

## NHS Reports Now Being Sent to HRM Via ClinicalConnect

We are pleased to announce that effective June 18, 2015, transcription and radiology reports from Niagara Health System and Hotel Dieu Shaver Health and Rehabilitation Centre are now being sent to OntarioMD's Hospital Report Manager (HRM) via ClinicalConnect.

HRM is enabling clinicians to receive reports electronically in their EMR from hospitals across Ontario. In the HNHB LHIN, we are leveraging the existing technology/platform of ClinicalConnect to push transcriptions and radiology reports from area hospitals to HRM so they are available to participating clinicians across Ontario. Data from other hospitals in the HNHB LHIN are scheduled for integration with HRM starting later in 2015 and through the summer of 2016. For more information about HRM, please visit [OntarioMD's website](#).

**ClinicalConnect eLearning**

New eLearning tutorials are now available for users to quickly understand the features and benefits of key ClinicalConnect modules and functionality. [Click here](#) to watch and learn how to optimize your user experience.

## Tutorials Now on YouTube

The ClinicalConnect eLearning tutorials which offer a quick video overview of key modules and functionality, can now be viewed on our YouTube channel by [clicking here](#). Check out the eLearning tutorials playlist, as well as a wide variety of other video testimonials featuring health services providers speaking to the benefits of ClinicalConnect.

## ClinicalConnect at the 10th Annual Medical Imaging Informatics and Teleradiology Conference

On June 19, 2015, Dale Anderson, Senior Manager, eHealth at the HITS eHealth Office, presented ClinicalConnect to radiologists and other diagnostic imaging professionals. The conference, held in Hamilton, was arranged by Dr. David Koff, Chief of Diagnostic Imaging at Hamilton Health Sciences and a ClinicalConnect champion. As previously announced, ClinicalConnect now aggregates diagnostic images from 47 acute care hospitals across South West Ontario.

ClinicalConnect is routinely used by diagnostic imaging professionals as it offers health information - particularly Labs and Transcriptions - about their patients from other source systems that can be helpful when making diagnoses. The ability to review related diagnostic images and reports about their patients can help to reduce exposure to radiation by not repeating tests unnecessarily. We thank Dr. Koff for including ClinicalConnect in the conference agenda.

ClinicalConnect™

CONNECTING SOUTH WEST ONTARIO

ClinicalConnect is the Regional Clinical Viewer for the connecting South West Ontario program, funded by eHealth Ontario. Hamilton Health Sciences is the regional service delivery partner deploying ClinicalConnect across the four south west LHINs. The cSWO Program is foundational to eHealth Ontario's commitment to integrate electronic health information for all Ontarians.
