

October eUpdate

Sole Practitioners Now Able to Access Additional Provincial Repositories

We're pleased to announce that another important milestone as part of the provincial initiative to build an electronic health record for all Ontarians has been achieved. Following approval from eHealth Ontario, ClinicalConnect Sole Practitioners (physicians) can now gain access to view data from various provincial repositories.

Previously, Sole Practitioners had been able to view data from the Ontario Laboratories Information System (OLIS) from within ClinicalConnect, assuming requisite agreements with eHealth Ontario were in place.

In ClinicalConnect, Sole Practitioner Participant Organizations are now able to gain access to:

- **Acute and Community Care Clinical Data Repository (acCDR)** consolidates patient data across selected hospitals and all 14 LHIN-HCC services. Learn more [here](#).
- **Diagnostic Imaging Common Service (DI Common Service)** provides access to diagnostic images and corresponding reports from hospitals and independent health facilities. Learn more [here](#).
- **Digital Health Drug Repository (DHDR)** includes data and information from Ontario publicly funded drugs and pharmacy services including Ontario Drug Benefits (ODB), OHIP+, Narcotics Monitoring System (NMS). Learn more [here](#).
- **Ontario Laboratories Information System (OLIS)** provides access to lab test orders and results from hospitals, community labs and public health labs. Learn more [here](#).

It's important to note that Sole Practitioners who wish to gain access to these (additional) repositories must use eHealth Ontario's ONE® ID credentials as their means to access the ClinicalConnect portal, and have the necessary agreement(s) in place with eHealth Ontario. Those Sole Practitioners who currently use Hamilton Health Sciences as their Identity (Account) Provider (iDP) – as opposed to ONE ID – may submit an iDP Conversion Request Form available [here](#).

Physicians practicing in south west Ontario, who are not yet approved as Sole Practitioner Participants in ClinicalConnect, can apply anytime; [click here](#) to review the application process and requirements, or contact your local [cSWO Change Management & Adoption Delivery Partner](#).

Semi-Annual Attestations Begin November 1, 2019

ClinicalConnect's Participant Organizations, including Sole Practitioners, are reminded that the next semi-annual attestation cycle begins on Friday, November 1. The purpose of attestations is to periodically check and certify that only the individuals who need access to ClinicalConnect and/or

the Access Governance System (AGS) have those privileges. As a recap, organization's Legal Signing Authorities will be prompted (by email, starting November 1) to attest that their organization's Privacy Contact and Local Registration Authority(s) LRAs still hold these roles; Privacy Contacts attest their appointed Privacy Auditors (if applicable to the organization) and in this cycle, complete the Annual Compliance Attestation; and LRAs attest their end users' access to ClinicalConnect. All attestations are performed by logging into AGS. As usual, reminders are sent at set intervals during the attestation period, and any questions may be directed to support@clinicalconnect.ca. Thank you in advance to all Participant Organizations for this cooperation to complete this important verification activity.

Participant Organizations Approved to Access Provincial Repository Data

The ClinicalConnect Program Office is pleased to announce that the following Participant Organizations have been provisioned with access to view data from the following provincial repositories, from within ClinicalConnect, in October 2019:

Repository	Organization
