June eUpdate

Don't Forget to Check ClinicalConnect for COVID-19 Results

DID YOU KNOW? ClinicalConnect provides COVID-19 results in the Microbiology Module through its data integrations with hospitals in south west Ontario, and the Ontario Laboratories Information System (OLIS) (if authorized to view data from OLIS; Encounter filter must be set to "All Regional Encounters").

Results will be displayed from hospitals in south west Ontario for COVID-19 tests that have been ordered and entered into the Hospital Information Systems (HIS). Note, in some cases results for the same test may appear from both OLIS & a hospital's HIS.

If you're a Physician who also subscribes to Health Report Manager (HRM), you'll also receive a notification for tests that have been resulted in OLIS, and you can log into ClinicalConnect to view the results. To learn more about how OLIS sends notifications to physicians through HRM, please click here.

## Easily Access ClinicalConnect Data Using Your Mobile Device

One of our best kept secrets is that the ClinicalConnect provider portal is mobile-friendly. You can view your patients' tests results while on the go and away from a traditional desktop setup. Using the mobile version of ClinicalConnect is easy and the results are highly legible.

There's no application to download – simply visit https://clinicalconnect.ca using your mobile device's web browser (ONE ID users can log on through their mobile device by visiting https://swo.clinicalconnect.ca). You will be able to retrieve the same data, including information from provincial repositories, as you would on a desktop device.

To make accessing ClinicalConnect even easier on a mobile device, consider creating a website shortcut on your device's home screen so you can quickly log in. Otherwise, click here to learn more about using the mobile-friendly version of ClinicalConnect.

Please be advised, this functionality only works if you are authorized to access ClinicalConnect via the web; for those authorized to only launch ClinicalConnect directly from your organization's health information system, you will not be able to access this web-based instance.

Drug Utilization Review Alerts to be Removed from ClinicalConnect

In line with direction received from the Ministry of Health, Drug Utilization Review (DUR) Alerts from the Digital Health Drug Repository that have been viewable by authorized ClinicalConnect users within the portal's Pharmacy Module (Home Med Drugs Tab), will soon be discontinued. ClinicalConnect users will be notified by email when these DUR Alerts are no longer available.

Participant Organizations Approved to Access Provincial Repository Data

The ClinicalConnect Program Office is pleased to announce that the following Participant Organizations have been provisioned with access to view data from the following provincial repositories, from within ClinicalConnect, in June 2020:

Sole Practitioners	
OLIS, DHDR, DI-CS, & acCDR	31 Sole Practitioner Participants were granted access to these repositories in June 2020

Welcome to New ClinicalConnect Participant Organizations

Congratulations to the following healthcare organizations that were approved to become ClinicalConnect Participant Organizations in June 2020:

- 2247450 Ontario Inc. [Waterloo Wellington LHIN]
- 11 physicians approved to access ClinicalConnect as Sole Practitioner Health Information Custodian Participants
