

## Resetting your ClinicalConnect Password Using the Self-Service Password Manager

This guide provides an overview of how to reset your ClinicalConnect password using the desktop or mobile version of Self-Service Password Manager (SSPM). To use the SSPM, a one-time registration enrolment is required. The SSPM registration will allow you to customize your own password, reset your forgotten password yourself, change your password to a new one, or unlock your account if it is locked, without having to contact your Local Registration Authority (LRA) or calling the Help Desk.

If you have enrolled in the SSPM previously, you will be able to reset your ClinicalConnect password using your desktop or mobile device (use mobile link). The ability to reset your own password is useful if you have forgotten it.

**!** SSPM is available for users who are logging into ClinicalConnect with the Authentication Domain of Partners.

**STEP 1**

Select the **PARTNERS** link below the login to access the SSPM site.

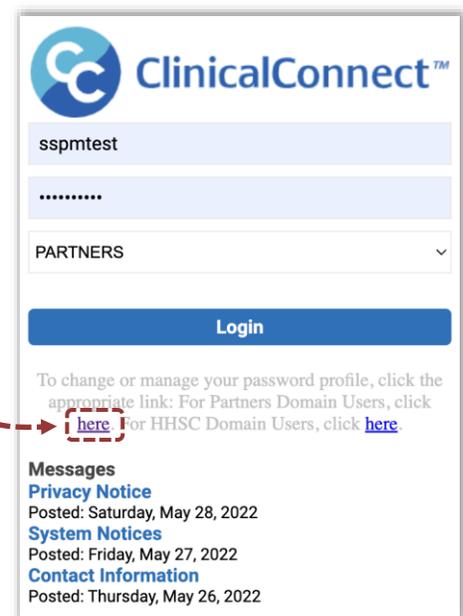

SSPM can be accessed from the following links:

SSPM Direct link from **Desktops**:  
<https://pm.clinicalconnect.ca>

SSPM Direct link from **Mobile Devices**:  
<https://pm.clinicalconnect.ca/m>

The SSPM portal is accessible directly from your Smartphone or Tablet running on any mobile platform including Android, iOS, Windows Mobile, and more.

**!** You cannot use your temporary password to log into ClinicalConnect. You must change it first.

**STEP 2**

Click the **Forgot Password** link.

**Sign In to Change Your Password**

User Name:

Password:

**Unlock Account**  
 Unlock your account after multiple failed login attempts.

**Forgot Password**  
 If you have forgotten your password, and **have previously enrolled in Self-Service Password Manager (SSPM) by setting up your security questions**, click **Forgot Password** above to reset your password yourself.  
 If you have forgotten your password but never enrolled in SSPM, you must contact your organization's Local Registration Authority to have your password reset manually.

Enter your User Name then enter the characters shown in the picture and click **Continue**.

SELF-SERVICE  
PASSWORD  
MANAGER

**Forgot your password?**  
To reset your password, start by entering your domain username.

\* Enter Username:  (Example : Jsmith)

Type the characters you see in the picture below.

Cancel Continue

English

You will be required to answer your previously registered security questions. These security questions and the correct answers will be used to confirm your identity. Take note of the time allotment to complete the unlock process.

STEP  
4

SELF-SERVICE  
PASSWORD  
MANAGER

sspctest (PARTNERS) 04:18

**Please answer the following question(s) to reset your password**

Question: What is your favorite (or dream) vacation location?

Question: What is your favorite (or least favorite) food?

Type the characters you see in the picture below.

Cancel Continue

STEP

5

Click **Continue** when both questions have been answered. Your new password requirements are identified on the screen. Use the fields provided to create a new confidential password and confirm your new password.

The **Password Strength** (colour of your new password) indicator updates to show the strength of your new password when you type it into the provided fields. This is based on the password requirements.

The following confirmation message will appear once your account has been successfully reset. You may now proceed with your normal operations using your account.

The account unlock has been done successfully.
